SITE AEO & SEO REVIEW — 10.2026

Page Reoptimization

- **Implement new keywords:**
  - *Our aim here is to focus on drivers but also speak to the DOT/verification side*
  - truck driver resume 201-500 / 33 / 100%
  - truck driver employment application 51-100 / 9 / 100%
  - dot driver application 51-100 / 28 / 100%
  - truck driver employment verification 11-50 / 28 / 100%
- **Update site title:**
  - **Current:** Provven | Blockchain-Verified Career Platform
  - **Revised:** Provven - Truck Driver Applications & Blockchain-Powered Employment Verification
  - *This keeps blockchain in the title*
- **Update meta description:**
  - **Current:** Build your Career Card, apply to jobs instantly, and get verified on-chain. The blockchain-verified career platform for drivers and software engineers.
  - **Revised:** Build a truck driver resume, complete DOT employment applications, and verify work history. Get a reusable Career Card backed by blockchain verification.
- **Update H1:**
  - **Current:** Proof, not paperwork.
  - **Revised options — any of these work in our opinion:**
    - The Truck Driver Resume and DOT Application You Own
    - **Build Your Truck Driver Resume and Reuse It for Every Job**
    - One DOT Application for Every Truck Driving Job
    - Truck Driver Resumes, Applications and Verified Work History
- **Update intro block below H1:**
  - Build your truck driver resume, maintain your employment history, and keep your credentials in one place. With Provven, you can update your professional profile and reuse your information when applying for trucking

jobs — without starting from scratch every time. Your experience. Your credentials. Your career, all in one place.

- **Note — in the future we may recommend new additions or revisions to the content on the page; we will need to ensure it speaks directly to truck drivers**

AEO Updates

- **No Schemas were detected on the site**
    - These are important for structured data and AI visibility
    - Implement **Organization** and **Website** schemas at a minimum
    - Ideally, also implement **LocalBusiness**
- **Review Google PageSpeed Insights recommendations**
    - These will likely have to be addressed by your team
    - Mobile review — this is where the most opportunity for improvement is
    - Desktop — only minor accessibility issues remain here
        - Note the contrast ratio for background colors — the body copy font color is particularly difficult to read, consider making it black
- **Implement a footer TLDR**
    - This is a concise summary of the entire page; important for AI
    - Example here, though ours is on the top of the page
    - Summary for review: Provven helps truck drivers build, maintain, and reuse a verified professional profile for job applications. Instead of repeatedly completing lengthy DOT employment applications and re-entering work history, drivers own one updatable Career Card that brings together their resume, employment history, credentials, and certifications. Powered by blockchain verification, Provven puts drivers in control of their professional information and makes it easier to pursue new career opportunities.
